

Plan 1 Focus on the comments Political Consultative Committee Member.

*present the committee video.

*timeline of the committee.

*a list of these comments will be presented.

comments:

1. Citizens should pay tax for the fresh air. Breathing fresh without paying anything is impossible.

2. Access to Internet should be permitted by the government. We are a Communist country governed by Communist Party. Unpermitted internet access is not allowed.

3. There is no such a law to reveal governor's properties. Governors are citizens as well, who also have individual privacy. Governors work for the country, but they are not slaves.

4. I had never voted against or abstained any proposals, because I love this country.
